Reason for the change Due to a job drop, I find myself closing the company collaboration and relocating personally trying to bring all my background into a larger structure that can enhance the skills acquired in the last 10 years in the Fintech & Project Management field
Strong Experience in Blockchain industry as DEFI, MINING & ALGO TRADING

Mining Experience

In particular, my experience in the mining field has developed in almost 5 years of activity, the first experiment was carried out in Italy with integration with an ES.CO. group. Company using a cogenerator to support for a peak power equal to 750KWH.

In succession I activated and followed projects in Europe and I had the opportunity to start a mining farm in Norway when the current had dropped to a competitive value with the Chinese market.

To my credit, as a company, I followed about 11 Micro Mining (Romania, Bulgarian, Switzerland, Ukraine etc) Companies before arriving at my latest project, now in conclusion, where I followed and coordinated for two years the creation of a transportable and displaceable mining farm, that could be placed on the roofs of buildings and integrated at the municipal level with the district heating ring that is about to be built. The latter was a significant project, as it creates a new opportunity to reuse the heat of the mining and a Mining data center distributed on the roofs of the buildings. (Project of 12 Mining Data Centers of 200 Kwh each for a total heating power of over 2400000 J / s to be structured in the municipal areas).

In all this experience I have had to deal with banks and venture funds, as well as structural problems, related to security and datacenter design, having the final word on the choice of project engineers.
